Questions, grade,

Realtime status:
finished / continue

grades above 70

Gets a cheers

sounds or claps

M-B populating of DB
should be possible

Populating of the
database to display
the question will be
done by me but
I will send first
few question when
the time is set
Age limit should
be included age
range should be

5-12, If age is
above 12 get a
message saying
oops the age is
too high with a smily
face.
A very correct answer
should get a
message saying:
well done with a
Star 🌟

and wrong answer
should get a
message saying

whoops' that is the
wrong answer let's
try again.
